

Expand your digital potential with Dentsply Sirona and join us for this stimulating one-day event.

# Integration of Digital Dentistry

## Evolve your digital capabilities.

Digital Dentistry has become one of the hottest topics amongst restorative dentists. Take what you have learned to the next level and GO DIGITAL. This course will give you the experience to utilize Dentsply Sirona Technologies for comprehensive dentistry as it relates to comprehensive diagnostics, treatment planning, surgical planning of implants, and digital restorative dentistry. The one-day curriculum will provide intensive review and detailed protocols to fully integrate both DS 3D and CEREC® for comprehensive progressive dental treatment. This course is intended for clinicians who want an edge by providing a digital workflow for their patients.

### Learning Objectives:

- Learn the fundamental concept of how both CEREC CAD/CAM and 3D CBCT integrate
- Leave with a working understanding of Sidexis 4.3, Galileos Implant software functions, and treatment planning tools
- Comprehensive overview of the digital implant planning workflow for chairside and lab process
- Understand the surgical guide options using CLASSICGUIDE, OPTIGUIDE, and CEREC Guide 2
- Workflow diagnosis and treatment of OSA, endodontics, functional restorative dentistry, and digital smile design

## Course Presenter: **Neal Patel, DDS, CDT**

Neal Patel, DDS, CDT graduated from The Ohio State University where he served as Implant Prosthodontic Fellow and helped establish techniques and protocols for Digital Implantology and Prosthetics. He went on to specialized study with renowned experts in the US and abroad. He has since become a national authority on 3D diagnostic imaging with cone beam computed tomography and same-day dental restorations with computer-aided design and manufacturing (CAD/CAM).

He is a unique combination of dentist and Certified Dental Technician, an accreditation involving intensive course study and a demonstrated mastery of the specialty areas of dentures, partial dentures, crowns and bridges, ceramics, orthodontics, and implants.

A testimony to his expertise, Dr. Patel travels extensively around the US, Canada, and overseas, training other doctors in the use of modern dental technology such as 3D imaging and computer-guided dental implant placement.
